Whether you are just beginning your career or you are a seasoned professional you can never know enough. At VCARE we subscribe to the notion that education and training is a life long journey.

INNOVATIVE LEARNING METHODS

We offer a unique approach to achieving a qualification, tailoring studies to our learners' in accordance with their needs and requirements. We promote best practice and high standards in industry, working to support and assist business and individuals through the implementation of blended learning.

ABOUT PROGRAM

Operating within a store's environment and managing the large quantities and value of stock is a competitive advantage in today's dynamic economy. Gaining this competitive advantage requires being able to identify the various operations within the store and recognizing the need to implement continuous improvement initiatives to make a store more productive. Being able to identify different categories of stock and knowing how to best ensure the right material is in the right place at the time it is needed.

This program is designed to increase knowledge of the role of the store, the functions of the store personnel, how stock is managed and moved into through and out of the store either to an internal customer or an external customer.

The program covers the role of the store in the 21st Century, how the store fits into the greater supply chain, the roles and responsibilities of those that work in a stores environment, the need for safety and security of both personnel and stock, the receipt, storage and issuing of stock, as well as the proper management of a company's valuable assets. Each of which presents a challenge to those responsible.
